REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a digital video-processing unit for processing an input signal to an output data signal for a display unit. The independent claim 1 identifies the distinct features: "a memory manager coupled with the processor and the memory means, the memory manager being arranged to transfer the input data signals to the memory means and to transfer the stored input data signal from the memory means to the processor for the first resizing, respectively, wherein an output of the processor is coupled to an input of the memory manager, wherein the memory manager is further arranged to transfer the output data signal from the processor to the memory means for storing the output data signal, and to transfer the stored output data signal from the memory means to the display unit, and wherein the memory manager is further arranged to transfer the stored output data signal from the memory means to the processor, and said processor is further arranged to execute the second resizing on the stored data output signal, wherein said processor and said memory manager are arranged to execute different processes in time multiplex". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
